Project: GeorgeousNails by Lwazi

1. Target Organisation

Organisation Name: GeorgeousNails by Lwazi

Organisation Category: Small Business – Nail Salon

Organisation Description

GeorgeousNails by Lwazi is a local nail salon that provides nail and beauty services to customers. The business focuses on giving customers good-quality nail services and helping them feel confident and happy with their appearance.

The services include different nail styles, manicures, pedicures, nail art, nail repairs and nail maintenance. Customers can choose designs according to their own preferences.

The target customers include women, students, working people and anyone who enjoys nail care and beauty services. The business does not currently have an **official website**. Customers mainly communicate with the business through social media, WhatsApp, referrals and word-of-mouth.

Reason for Choosing the Organisation

I chose GeorgeousNails by Lwazi because it is a real business that can benefit from having a professional website. The website will make it easier for customers to find information about the business, view the services and nail designs, and contact the salon.

2. Website Project Proposal

2.1 Organisation Overview

GeorgeousNails by Lwazi is a local nail salon offering different nail and beauty services. The business aims to provide customers with attractive and quality nail services in a friendly environment. The website will give the business a professional online presence and make information easier for customers to find.

2.2 Website Goals and Objectives

The main goal is to create a professional and easy-to-use website for GeorgeousNails by Lwazi.

The website will:

- Display the salon's services.
- Show examples of nail designs.
- Provide contact information.
- Provide booking or enquiry information.

- Show opening hours and location.
- Help new customers find the business.
- Give the business a professional online presence.

2.3 Current Website Situation

GeorgeousNails by Lwazi does not currently have an official website. Customers mainly use social media, WhatsApp and referrals to communicate with the business. A website will put the important business information in one place.

2.4 Proposed Website Features

The website will have five main pages:

- 1.Home
- 2.About Us
- 3.Services
- 4.Gallery
- 5.Contact Us

The website will also have a navigation menu, images, contact information and a responsive layout.

2.5 Design and User Experience

The website will have a clean, attractive and modern design suitable for a nail salon. The existing GeorgeousNails by Lwazi logo will be used as part of the branding. The website will use clear headings, readable text, suitable images and simple navigation. It will also be designed to work on different screen sizes.

2.6 Technical Requirements

The website will use:

- HTML for the structure.
- CSS for styling.
- JavaScript where required.
- Images and the client's existing logo.
- A web browser for testing.

3. Website Assets

3.1 Logo

I will use the existing GeorgeousNails by Lwazi logo provided by the client.

Source: Existing logo provided by the client.

The logo will be used mainly in the website header and will help keep the website connected to the business branding.

3.2 Photos

I will use photographs of nail designs, manicures, pedicures and other services.

Source Evidence-Existing Client Photos

3.3 Text

The website will contain information about:

- The business
- Services
- Nail designs
- Prices where available
- Opening hours
- Location

- Contact details
- Booking/enquiry information

3.4 Graphics and Icons

Simple icons may be used for:

- Phone
- WhatsApp
- Location
- Social media

3.5 Asset Organisation

The images will be kept in an images folder with clear file names, for example:

- . logo.png
- . nail-design-1.jpg
- . nail-design-2.jpg
- . manicure.jpg
- . pedicure.jpg

4. Website Pages and Content

4.1 Home Page

The Home page will be the first page visitors see.

It will include:

- Logo
- Welcome message
- Short introduction
- Main nail image
- Services link
- Contact/booking information

4.2 About Us Page

This page will explain more about GeorgeousNails by Lwazi and what the business offers.

4.3 Services Page

This page will show the different services offered, such as:

- Acrylic nails
- Gel nails
- Manicures
- Pedicures
- Nail art
- Nail repairs
- Nail maintenance

Prices will be added where correct information is available.

4.4 Gallery Page

The Gallery will display photographs of nail designs and completed work. This will allow customers to see examples of the salon's work.

4.5 Contact Us Page

This page will include:

- . Phone number
- . WhatsApp
- . Social media information
- . Location
- . Opening hours

Contact/enquiry

4.6 Website Navigation

All five pages will be connected through a navigation menu.

The navigation will allow users to move between:

Home | About Us | Services | Gallery | Contact Us

5. Website Sitemap

The sitemap shows how the pages of the website will be organised.

HOME

ABOUT US | SERVICES | GALLERY | CONTACT US

All pages will have the main navigation menu and a link back to the Home page.

Purpose of the Sitemap

The sitemap helps me plan the website before development. It makes sure that the pages are organised and that users can easily find information.

6. Website Folder and File Structure

I will organise my website files into different folders so that the project is easy to manage.

The structure will be:

GeorgeousNails/

|

├── index.html

├── about.html

├── services.html

├── gallery.html

├── contact.html

|

├── CSS/

| └── style.css

|

├── js/

| └── script.js

|

└── images/

├── logo.png

└─ nail-design-1.jpg

└─ nail-design-2.jpg

└─ manicure.jpg

└─ pedicure.jpg

The HTML files will contain the website pages. The CSS folder will contain the styling, the JavaScript folder will contain functionality, and the images folder will contain website images.

7. Website Content Research and Sourcing

I will research information that is needed to create the website.

The information will include:

-Nail services

-Nail design ideas

-Business information

-Contact information

-Opening hours

-Location

-Images

-Suitable website design ideas

Information about GeorgeousNails by Lwazi will be obtained from the client and available business information.

For images, I will use photographs supplied by the client where possible. If I need additional images, I will use free-to-use images and record the source.

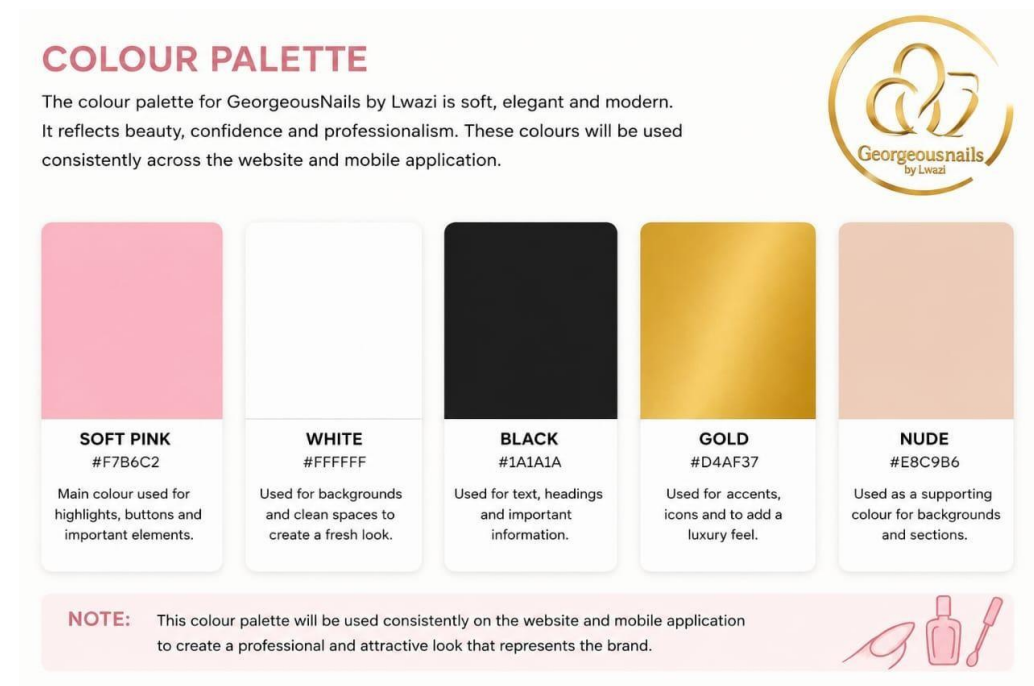

I will make sure that information and images used on the website are appropriate and relevant to the business.

8. Website Design and Colour Palette

The website will have a clean and attractive design that matches the nail salon.

The existing GeorgeousNails by Lwazi logo will guide the colour choices.

Colour Palette

The colours will be used consistently throughout the website.

9. Typography

I will use simple and readable fonts.

The main headings will be slightly larger and more noticeable, while normal paragraphs will use a clear font size that is easy to read.

The same fonts will be used throughout the website to keep the design consistent.

10. Responsive Design

The website will be designed to work on different devices.

It should be easy to use on:

- Desktop computers
- Laptops
- Tablets
- Mobile phones

The layout and images will be adjusted so that users do not have to struggle to read the content or navigate the website on smaller screens.

11. Website Navigation

The navigation menu will appear consistently on the website.

The main links will be:

Home | About Us | Services | Gallery | Contact Us

Users should be able to move between the pages without getting confused.

The navigation will also help users quickly find services and contact information.

12. Testing

I will test the website after creating the pages.

I will check:

- All links work.
- All five pages open correctly.
- Images display correctly.
- Text is readable.
- Navigation works.
- The contact form works as expected.
- The website displays correctly on different screen sizes.
- There are no obvious HTML or CSS errors.

I will fix errors that I find during testing.

13. GitHub and Version Control

14. README.md

15. Timeline

Stage	Activity
Stage 1	Choose organisation and research
Stage 2	Plan website and sitemap
Stage 3	Create HTML pages

Stage 4	Add images and content
Stage 5	Add CSS styling
Stage 6	Add functionality where required
Stage 7	Test and fix errors
Stage 8	Finalise website and documentation

16. Estimated Budget

The project is being developed as an academic project, so there is no major development cost.

If the website is published for the real business, possible costs could include:

- . Domain name
- . Website hosting
- . Website maintenance

These costs will depend on the service provider selected.

17. Conclusion

The proposed GeorgeousNails by Lwazi website will give the business a professional online presence. It will allow customers to learn about the salon, view services and nail designs, and find contact information easily.

The website will also help me demonstrate my web development skills by creating a structured, attractive and responsive website using HTML, CSS and other required technologies.
